

1. INTRODUCTION

1.1 Organization Profile:

Wathare Infotech Solutions is the startup company of software products development, desktop applications in Satara, Maharashtra. Wathare Infotech Solutions is a leading software solution developer company with core focus on developing and scaling anything that can go on the internet. They are providing you the best range of Web Development, Single Page Application, Mobile Apps and E-Commerce Software Solution with effective and timely delivery. Wathare Infotech Solution will try to give 100% client satisfaction; we will provide quick response to our client. Wathare Infotech Solutions use client based development model, so each product we produce is absolutely unique. Wathare Infotech Solutions always follows client first policy to make sure clients need should be satisfied. We never compromise in Quality, which made us to improve to this position.

Vivah Bandhan is a stand-alone service offered by Wathare Infotech Solutions for matrimonial platform vivahbandhan.org which is a platform dedicated to Brahmin Community and to help Brides-to-be and Grooms-to-be find their Best Match. To help all communities, we have our other portals dedicated to individual communities. Other communities cannot register in respective websites. Increased consumer demand for innovative products at lower costs presents tremendous challenges for companies trying to satisfy both requirements.

The Wathare Infotech Solutions have another branch which name as Wathare Hygienic Solutions. This provides the services include various products in various domains like Manufacturing and Chemicals.

Location of Company:

Office Address: Plot No. E-3/4, MIDC Satara - 415002.

Phone: +91 9422032969/+912164 225058

1.2 About Project:

Project Title: Mai Service

In present scenario, people are buried up in a heavy. As everyone is engaged with busy schedules, and for doing household work no one interested to waste there precious time. Mai Service find solution of that they provides the variety of services like plumbers, movers, carpenter, pest control, cleaners, electricians, painters, lawn care ,pet care and many more.

The primary objective of this system for household services is about delivering the home services at the door step just by one click .Mai Service is the system provides the facilities to the user as well as service provider. For user a very simple process for book the service provider, get estimation of the service, appointment with service provider and this system is specialized with providing a confirmation email & message about the selected service.

Another objective of this system is to provide registration for workers who need a job/work directly from user. We maintain relation between user & service providers. A Service provider purchases the plan and adds the multiple services. The system will enable different service providers to reach their clients & get paid.

Mai Service is a multi-vendor system. Each vendor will be allowed to view their activities detailed statistics and reports that will help them to improve. Also user can check there history details, responses of service providers.

Project Guide: Prof. Mane.S.G

Team Member: One

1. Miss. Shinde Bhagyashree Rajendra.

1.3 Existing System and Need for System

Our whole existing system is fully depends upon daily work also all worker are cannot find work directly to the user. User cannot find provider easily. They are facing some problems they low-hardly reach to each other. If any issues encounter unexpectedly, it's distract them from professional life. They hire worker with reference of other people. Sometimes fraud person are waiting for that chance

Firstly, user need to find out service provider check if it is available or not and also about amount. They also have another problem is to user cannot easily compare with another service provider it time consuming process. Sometime hiring the providers can be quite expensive. Each & every day it's a challenge to service provider to finding the job.

Person who are recently relocate to the new city they have many issues regarding home services and finding the right person for doing the work that's why there life is more stressful.

Need for System

Especially in metro cities life has become so mechanical that people don't have time for their personal life. In this era people surly not have time to find home service professionals and assign them requires job with the help of Mai service ,you can easily find the right professional for your job.

Main need of this system is that user can get the home service professionals by clicking and searching based on professions without the wasting there time. Also view details of services.

Another one of the main need of this system is that here home service professionals can grow their business and get more job offers throw Mai service.

Problems in Existing system

There are some problems occur in existing system which are follows:

1. Sometimes cannot get trusted pros to complete all your home projects.
2. Service provider cannot get easily job/work offers.
3. Sometimes service provider can't recognize that they are in profit or loss situation.

1.4 Scope of Work

1. In this system provide door to door service.
2. Instead of searching various services provider it has been become very easy to option service online.
3. Our system also helps to the home service professional for the finding the more jobs offers.
4. Users can find the service provider by the pincode & category, they get easily connect with them.
5. Easily make appointment with service provider & get estimation of the work within 24hrs.
6. Service provider gets jobs/work directly from user.

1.5 Operating Environment – Hardware and Software

To develop this website following hardware and software configuration is used.

Software Requirements-

- ❖ Front End : HTML, CSS, JavaScript, Bootstrap
- ❖ Back End : PHP 7.2, MySQL 5.7,
- ❖ Reporting Tool : Datatable ,Chart Js
- ❖ Editor : Visual Studio Code
- ❖ Web Server : XAMPP Server (Apache 2.4)
- ❖ Operating System : Windows XP / 7 / 10 and above

Hardware Requirements-

- ❖ Microprocessor : Intel(R) Pentium(R) 1.10GHz
- ❖ RAM : 1 GB
- ❖ Hard Disk : Minimum 80 GB
- ❖ Printer : HP Inkjet 3900 Series and other

1.6 Detail Description of Technology Used

PHP [Back End]

"PHP is an HTML-embedded scripting language. Much of its syntax is borrowed from C, Java and Perl with a couple of unique PHP-specific features thrown in. The goal of the language is to allow web developers to write dynamically generated pages quickly."

PHP is the widely-used, free, and efficient alternative to competitors such as Microsoft's ASP. PHP stands for **PHP: Hypertext Preprocessor**. PHP is a server-side scripting language, like ASP. PHP scripts are executed on the server. PHP supports many databases. PHP is open source software. PHP is free to download and use. PHP files can contain text, HTML tags and scripts. PHP files are returned to the browser as plain HTML. PHP files have a file extension of ".php".

Features

1. PHP runs on different platforms (Windows, Linux, UNIX, etc.)
2. PHP is compatible with almost all servers used today (Apache, IIS, etc.)
3. PHP is FREE to download from the official PHP resource: www.php.net
4. PHP is easy to learn and runs efficiently on the server side.
5. PHP code is executed on the server, and the plain HTML result is sent to the browser.
6. Reduce the time to create large websites.
7. Create a customized user experience for visitors based on information that you have gathered from them.

Common uses of PHP

1. PHP performs system functions, i.e. from files on a system it can create, open, read, write, and close them.
2. PHP can handle forms, i.e. gather data from files, save data to a file, thru email you can send data, return data to the user.
3. You add, delete, and modify elements within your database through PHP.
4. Access cookies variables and set cookies.
5. Using PHP, you can restrict users to access some pages of your website.
6. It can encrypt data.

Characteristics

Basic PHP Syntax

A PHP scripting block always starts with `<?php` and ends with `?>`. A PHP scripting block can be placed anywhere in the document. On servers with shorthand support enabled you can start a scripting block with `<?` and end with `?>`.

\$ GET Function

The built-in `$_GET` function is used to collect values from a form sent with `method="get"`. Information sent from a form with the GET method is visible to everyone and has limits on the amount of information to send.

\$ POST Function

The built-in `$_POST` function is used to collect values from a form sent with `method="post"`. Information sent from a form with the POST method is invisible to others and has no limits on the amount of information to send.

\$_REQUEST Function

The PHP built-in `$_REQUEST` function contains the contents of both `$_GET`, `$_POST`, and `$_COOKIE`.

Include Function

Include function takes a file name and simply inserts that file's contents into the script that calls used the include function.

Require Function

Require function is used to include a file into your PHP code. However there is one huge difference between the two functions, though it might not seem that big of a deal.

Sessions

Sessions work by creating a unique identification (UID) number for each visitor and storing variables based on this ID. This helps to prevent two users' data from getting confused with one another when visiting the same webpage.

Cookies

Cookies have been around for quite some time on the internet. They were invented to allow webmaster's to store information about the user and their visit on the user's computer.

MySQL Server [Back End]

1. MySQL is an open source, database server. It is ideal for both small and large applications.
2. MySQL supports standard SQL and compiles on a number of platforms. It is free to download and use.
3. MySQL SQL is the standard query language for interacting with databases.
4. MySQL is also cross platform.

MySQL Database

MySQL is the world's most popular open source database for cost-effectively delivering reliable, high performance and scalable e-commerce, online transaction processing, and embedded database applications. It is an integrated, transaction safe, ACID-compliant database with full commit, rollback, crash recovery, and row-level locking capabilities. MySQL delivers the ease of use, scalability, and high performance, as well as a full suite of database drivers and visual tools to help developers and DBAs build and manage their MySQL applications. The MySQL Database provides the following features:

1. High Performance & Scalability to meet the demands of exponentially growing data loads and users.
2. Self-healing Replication Clusters to improve scalability, performance and availability.
3. Performance Schema for monitoring user & application level performance and resource consumption.
4. SQL & NoSQL Access for performing complex queries and simple, fast Key Value operations.
5. Platform Independence giving you flexibility to develop and deploy on multiple operating systems.

MySQL: Features

1. Speed
2. Multi-threaded architecture - Multiple clients have concurrent access
3. Reliability
4. Ease of use - Command line interface, Graphical tools- Desktop/ Web based.
5. Multi-User support
6. Scalability
7. Portability

Java Script [Scripting Language]

JavaScript is a lightweight, interpreted programming language. It is designed for creating network-centric applications. It is complimentary to and integrated with Java. JavaScript is very easy to implement because it is integrated with HTML. It is open and cross-platform.

JavaScript is the most popular programming language in the world and that makes it a programmer's great choice. Once you learnt JavaScript, it helps you developing great frontend as well as back-end software's using different JavaScript based frameworks like jQuery, Node.JS etc. JavaScript helps you create really beautiful and crazy fast websites. You can develop your website with a console like look and feel and give your users the best Graphical User Experience.

JavaScript usage has now extended to mobile app development, desktop app development, and game development. This opens many opportunities for you as Javascript Programmer.

Applications of Javascript Programming

1. Client-side validation
2. Manipulating html pages
3. User Notifications
4. Back-End Data Loading
5. Server Applications

Uses of Javascript Programming

1. Web Development / Application
2. Games
3. Mobile Application
4. Smartwatch Application
5. Presentations

Bootstrap 4 [Front End-CSS Framework]

Bootstrap is a free and open-source CSS framework directed at responsive, mobile-first front-end web development. It contains CSS- and JavaScript-based design templates for typography, forms, buttons, navigation, and other interface components.

Bootstrap is a free collection of tools for creating a websites and web application. It contains HTML and CSS-based design templates for typography, forms, buttons, navigation and other interface components, as well as optional JavaScript extensions. Bootstrap, as I know it, is a well-defined CSS.

Bootstrap has a lot of features. These features not only make it stand out, but they also make it more popular even among those web designers. Who like to take things in a very conventional way. The bootstrap provides the following features:

1. It is pretty easy, to begin with being easy to get started with is probably the first quality which makes bootstrap very appealing.
2. Bootstrap not only offers less files but also includes the old css files.
3. It is totally customizable.
4. Fast and time saving framework.

Advantages of Bootstrap Development are:

1. Lightweight and customizable
2. Fewer cross browser bugs.
3. Responsive structures and styles.
4. Loads of free and professional templates, wordpress themes and plugins.
5. Several javascript plugins using the jquery.

2. PROPOSED SYSTEM

2.1 Proposed System

Mai Service is a dynamic web based system where users can view various home services along with their details. The proposed system helps in many ways. As this project enables the end users to register to the system online, select the service provider of their choice from the service provider list, book that service provider, get estimation of service and also make appointment with them. And the service provider can purchase the plans and add services, photos, videos & service details.

1. Admin can manage the overall things in the system.
2. After purchasing plan the service provider can add service details, images, videos, view booking, view request estimation for service with requirement and update it. That service display on home page of website and also get some other facility. Add the appointment fee with adding service.
3. User can get easily the list of service providers of Satara city. Also we have got detailed information about service provider like address, images, videos, reviews.
4. User can make appointment of the service provider on your time slot and book the date of appointment.
5. User can send request of estimation to the service provider & get response back.
6. For hire the professionals must have to pay advance amount of selected service provider.
7. Service provider get facilities by purchasing plan. They can add multiple services & get a free visiting card.

2.2 Objectives of System

Every system is designed to achieve one or more objectives. The main objective of that system to overcome some problems that comes during existing system.

The main aim to develop this system is to provide the good & quick services. This system also provides all the reports. Document needed for varies activities & proper decision making.

1. To get appropriate service and save the precious time.
2. The main feature of website is its user-friendly interface.
3. The main objective of the system is to users can easily view the services and make appointment with professionals but only registered user can request for estimation & hire the service provider.

4. Users can easily make appointment with service provider basis on time slot and fix appointment date. No need to register on website.
5. The system calculates bill instantly and user can pay online. Hence the system saves time, efforts and cost.
6. Service provider can easily update the details; view the booking, estimation and appointment requests.
7. To provide all necessary reports for admin, service provider & pro service provider.

2.3 User Requirements

1. Provide door to door service.
2. Without wasting time get service & trusted service.
3. Within 24 hrs. Get response from service provider.
4. To keep detail information and accurate record of services.
5. The system should be able to take review for the services.
6. User should be able to hire any service provider according to his choices and search.
7. Users can view service details, request for appointment and estimation of service from anywhere and at any time. There is no time limit.

3. ANALYSIS & DESIGN

3.1 Data Dictionary:

3.1.1. Table Name: - tbl_admin

Field Name	Description
id	Admin Id
name	Admin Name
email	Admin Email
password	Admin Password

3.1.2. Table Name: - tbl_plan

Field Name	Description
id	Plan Id
name	Plan Name
quarter	Quarterly Price
six_month	Six Monthly Price
annual	Annually Price

3.1.3. Table Name: - tbl_category

Field Name	Description
id	Category Id
name	Service Category Name
image	Service Image

3.1.4. Table Name: - tbl_serviceprovider

Field Name	Description
id	Service Provider Id
name	Service Provider Name
contact	Service Provider Contact
email	Service Provider Email
city	City
profile	Service Provider Profile Photo
password	Password
address	Service Provider Address
state	Service Provider State
pincode	Service Provider Pincode
reg_date	Service Provider Registration Date

3.1.5. Table Name: - tbl_serviceprovider_pro

Field Name	Description
pro_id	Pro Service Provider Id
name	Pro Service Provider Name
contact	Pro Service Provider Contact
email	Pro Service Provider Email
city	City
profile	Pro Service Provider Profile Photo
password	Password
address	Pro Service Provider Address
state	Pro Service Provider State
pincode	Pro Service Provider Pincode
reg_date	Pro Service Provider Registration date
end_date	Pro Service Provider End date
status	Pro Service Provider Account Status

3.1.6. Table Name: - tbl_plan_purchase

Field Name	Description
purchase_id	Plan Purchase Id
sp_id	Service Provider Id
plan_id	Plan Name
period	Plan Period
order_id	Order Id
amount	Plan Amount
payment	Payment Status
start_date	Plan Active Date
end_date	Plan Deactivate Date
plan_status	Plan Status

3.1.7. Table Name: - tbl_service

Field Name	Description
id	Service Id
sp_id	Service Provider Id
service name	Service Name
category	Service Category
phone	Service Provider Phone Number
location	Service location
description	Service Description
photo	Service Logo Photo
member	Members Work In Service
appointment fee	Appointment Fee
status	Service Status
reg_date	Service Register Date

3.1.8. Table Name: - tbl_service_details

Field Name	Description
id	Service Details Id
service_id	Service Id
email	Service Provider Email
city	City
pincode	Pincode
exp	Experience In This Service
start_date	Starting Date Of Service
details	Service Details

3.1.9. Table Name: - tbl_faq

Field Name	Description
id	FAQ Id
service_id	Service Id
faq1	Answer Of Faq Question 1
faq2	Answer Of Faq Question 2

3.1.10. Table Name: - tbl_media

Field Name	Description
id	Media Id
service_id	Service Id
banner	Service Banner Image
work_image1	Working Image
work_image2	Working Image
work_image3	Working Image
video	Service Video

3.1.11. Table Name: - tbl_user

Field Name	Description
user_id	User Id
user_name	User Name
mobile	User Mobile Number
address	User Address
password	Password
email	Email Id
city	City
state	State
pincode	Pincode
profile	Profile Photo
reg_date	User Registration Date

3.1.12. Table Name: - tbl_contact

Field Name	Description
id	Contact Id
name	User Name
email	Email Id
phone	Phone Number
message	Message

3.1.13. Table Name: - tbl_appointment

Field Name	Description
id	Appointment Id
service_id	Service Id
userid	User Id
name	User Name
email	User Email
contact	User Contact Number
address	User Address
a_date	Appointment Date
time	Appointment Time
status	Appointment Status

3.1.14. Table Name: - tbl_estimate

Field Name	Description
est_id	Estimate Id
service_id	Service Id
user_id	User Id
date	When Service Want Date
problem1	Problem Regarding Service
problem2	Problem Regarding Service
issue	Problem Regarding Service Photo
name	User Name
email	User Email
contact	User Contact Number
token	Estimate Token
estimate_date	Estimate Date
rate	Service Rate Depend on Service

3.1.15. Table Name: - tbl_booking

Field Name	Description
book_id	Booking Id
service_id	Service Id
user_id	User Id
b_date	When Service Book Date
requirement	Requirement Of Service
issue	Problem Regarding Service Photo
name	User Name
email	User Email
contact	User Contact Number
address	User Address

3.1.16. Table Name: - tbl_payment

Field Name	Description
payment_id	Payment Id
order_id	Order Id
book_id	Provider Booking Id
service_id	Service Id
cust_id	User Id
txn_amount	Advance Payment Amount
booking_status	Service Booking Status
payment_mode	Payment Mode
payment_status	Payment Status
trans_id	Transaction id
date	Payment Date

3.1.17. Table Name: - tbl_review

Field Name	Description
id	Review Id
service_id	Service Id
name	User Name
message	Review On Service Provider
date	Review Date

3.2 Table Specifications (Design)

3.2.1. Table Name: - `tbl_admin`

Field Name	Data Type	Size	Constraint
id	Bigint	3	Primary Key
name	Varchar	30	Not Null
email	Varchar	30	Not Null
password	Varchar	50	Not Null

1.3. Edit Plan – Here edit the subscription plan.

The screenshot shows the 'Admin Panel' interface with a sidebar containing links like Dashboard, Business Status, Plans, Service Category, Services, Service Provider, Permission Account, and Report. The main area is titled 'Subscription Plan' and shows an 'Edit Plan Details' form. The form includes fields for Plan ID (4), Plan Name (Demo), Quarterly Price (100), Six Month Price (100), and Annual Price (100). A success message 'Plan Updated Successfully!!!' is displayed above the form, and an 'OK' button is visible. The table below shows one entry: Demo, 100, 100, 100. The bottom right corner has a 'Update' button.

Plan ID	Plan Name	Quarterly Price	Six Month Price	Annual Price	Actions
4	Demo	100	100	100	<button>Update</button>

1.4. Delete Plan – From here admin delete the plan.

The screenshot shows the 'Admin' interface with a sidebar containing links like Dashboard, Plans, Service Category, Service Provider, and Report. The main area is titled 'Subscription Plan' and shows a confirmation dialog asking 'Do you confirm to delete plan 4?'. The dialog has 'OK' and 'Cancel' buttons. Below the dialog, the table shows four entries: PREMIUM, BASIC, STARTER, and Demo. The 'Demo' row has a red 'X' icon in the Actions column, indicating it is selected for deletion.

Plan ID	Plan Name	Quarterly Price	Six Month Price	Annual Price	Actions	
3	PREMIUM	500	900	1900		
2	BASIC	400	700	1500		
1	STARTER	300	500	1100		
4	Demo	100	100	100		

Service Category

1.1. Add Category – Here admin add more categories.

The screenshot shows the Admin Panel interface for adding a new service category. A modal window titled "Add Service Category" is open. Inside the modal, there is a field labeled "Service Category Name:" with the value "Demo". Below it is a "Service Photo:" section with a file input field containing "demo.jpg". At the bottom of the modal are two buttons: "Add" and "Close". The background shows a list of existing service categories with columns for "Category ID", "Category Name", and "Image".

1.2. Edit Category – Here admin can edit category details.

The screenshot shows the Admin Panel interface for editing a service category. A modal window titled "Edit Service Category" is open. Inside, the "Category ID" is set to "16" and the "Category Name" is "Demo". There is also a "Service Photo" section with a file input field containing "demo1.jpg". At the bottom right of the modal is an "Update" button. The background shows a list of service categories with columns for "Category ID", "Category Name", and "Image". A message at the top right says "localhost says Category Updated Successfully!!!".

1.3. Delete Category – Here admin can delete category.

The screenshot shows the Admin Panel interface for deleting a service category. A modal window titled "localhost says Do you confirm to delete service category 16?" is open. At the bottom right of the modal are "OK" and "Cancel" buttons. The background shows a list of service categories with columns for "Category ID", "Category Name", and "Image". A message at the top right says "localhost says Service Category having id 16 has been deleted".

1.4. View Category – Here display all categories with details.

Screenshot of the Admin Panel showing the Service Category list.

The page title is "Admin Panel" and the section title is "Service Category". A pink button on the right says "Add Service Category".

The map also shows the Krishna River, Grampanchayat Office, Gove, and Civil Hospital. A success message box in the top right corner says 'localhost says Successfully Submitted' with an 'OK' button.

3.6 Test Procedures and Implementation:

Testing is a critical activity of software quality assurance and represents the ultimate review of specification design and coding. The engineer creates a series of test cases that are intended to demolish the software that has been built. Testing is the one step in the software engineering process that could be viewed as destructive rather than constructive.

Objective of Testing:-

- Testing is a process of executing a program with the intent of finding an error.
- A good test case is one that has a high probability of finding an as yet undiscovered error.
- A successful test case is one that uncovers an as yet undiscovered error.

Types of Testing:-

1. White box testing.
2. Black box testing.

1. White box Testing:-

White box testing is a test case design method that uses the control structure of the procedural design to derive test cases. Using white box testing methods the software engineer can derive test cases that

- Guarantee that all independent paths within a module have been exercised at least.
- Execute all loops at their boundaries and within their operational bounds.
- Exercise internal data structure to ensure their validity.
- Exercise all logical decisions on their true and false sides.

Black box Testing:-

Black box testing focuses on the functional requirements of the software. Black box testing was used while integrating various parts of the module as a validation testing tool.

Test Reports:**Test case for login:-**

Test case ID: Login					
Test case Name : Test Case For User Login					
Pre- Requisite: User must register first.					
Step No	Step to be Executed	Expected Result	Actual Result	Pass/ Fail	Remark

Limitations: -

1. This system only for satara city.
2. We cannot refund your advance booking payment.

2. FUTURE ENHANCEMENTS

1. We will include more cities.
2. We will give facilities for refund your advance booking payment

7. CONCLUSION

Now a day's Each & Every Person is busy with his/her routine, business job, household work but no one is interest to waste their precious time .In day to day life household/personal services. Due to their standard lifestyle there are becoming careless in few services such as lack of Plumber, Maid, and Carpenter etc. To overcome these problems we proposed computerized system a website Mai services .This System makes our life easy by providing access to different services.

Instead of searching various services provider it has been become very easy to option service online. In our Proposed System we provide registration of visitor or user so they can set services as per their requirement .In our Mai Services we provide registration for worker who need a job/work directly from user .we maintain relation between user & worker .we maintain all the report which need for user or admin .through this web application total services get to the user easily without wastage of time also a good computerized system for admin to maintain all records.

So, overall this system will give the users a better user friendly environment to hired service provider.

- Susan Burger
- Drew Dietterle
- Bobby Plucinik
- Darrell Handelsman

1.2. Safety

Before hiring on Mai Service, read our tips and things to look out for.

Review The Provider's Profile

The easiest way to learn about a professional is by viewing their profile. These profiles provide important details about a professional's offered services and years of experience, as well as the quality of their work. Specifically, you'll want to look at:

1. **Customer reviews.**

Reading about past customer experiences can provide insight into how your own experience might go. Sometimes a professional might respond to these reviews, which will offer further insight concerning their customer interactions. For instance, a professional who tries to right a problem or receives only positive reviews will likely be easier to work with than someone who responds angrily to negative reviews.

2. **Business information.**

You can learn more about each professional by reading their introduction section and business information. Here, each pro can mention whatever they deem most important, be it their experience, description of service, photos or video. Not only will you learn more about each pro, but you'll also learn what they prioritize when discussing business.

Tips to choose the right pro

Read Reviews

Learn about a pro's quality and professionalism by reading other customer's experiences.

View Photos & Videos

Photos and videos are an excellent way to visualize a pro's abilities and work quality.

You're the boss

Need more information? Ask the pro to provide what you are looking for.

2. Provider's

2.1. How it works

Send a professional quote
Your quote is your first impression. Mai Service customers are looking to hire the best professional for their projects. Treat your quote as a professional introduction to a potential new customer. Greet them by name, address their needs or concerns, and ask them questions.

Share your rates
Customers are more likely to hire when they know the cost. If they are going to hire you for their project price will be important. Explain your rates in details. Tell the customer exactly what to expect for that rate. Why you charge what you do and how that rate is a price to pay for your services.

Create an awesome profile.
Your profile is automatically sent to customers you send a quote to. Make sure your profile advertises you well. Make sure your profile image is inviting; a company logo or picture of you is best. We make it easy to list your years of experience and credentials too so be sure to add them.

Reviews.
The number one selling point for service based business is reviews. You can get past and current customer to post reviews on your profile so that when you send a quote to a new customer they can read about all the customer that enjoy working with you.

Use up your credits.
You won't get hired every time you send a quote. On average you will get hired 1 or 2 times out of 10 quotes, so keep quoting. Not all customers will reply, that is OK. Just keep sending quotes and you will make a nice return on your investment.

[Sign up & grow your business](#)

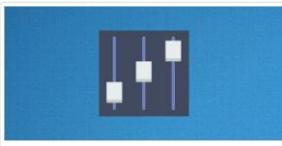

2.2. Pro Guide

Learn the basics.

Profile
A great profile will help you get new customers.

Building a great profile

Services
Connect with customers who are right for your business.

Month Wise Appointment Report –

Enter month with year & display the month wise report of appointment in tabular format.

The screenshot shows the 'Service Provider Panel' interface, similar to the previous one but for the month of April. The sidebar and main title 'Appointment Report' are identical. The search bar now shows 'Search: 2020-04'. The table below the buttons shows three entries:

Sr.No ↑↓	Customer Name ↑↓	Address	Email	Date ↑↓	Time ↑↓	Status ↑↓
3	Akshay Jadhav	at post Gove tal dist satara	akshayjadhav@gmail.com	2020-04-01	01.00pm-02.00pm	Approve
4	Sonal Jagtap	Varye,Satara	sonaljagtap@gmail.com	2020-04-05	10.00am-11.00am	Approve
5	Priti Khandare	at post wai tal dist satara	priti123@gmail.com	2020-04-14	11.00am-12.00am	Reject

At the bottom, it says 'Showing 1 to 3 of 3 entries (filtered from 8 total entries)' and includes navigation links 'Previous' and 'Next'.

Approve Appointment Report – Display approve appointment report in .pdf format.

Sr.No	Customer Name	Address	Email	Date	Time	Status
1	Sonal Jagtap	Varye Satara	sonaljagtap@gmail.com	2020-03-29	11.00am-12.00am	Approve
3	Akshay Jadhav	at post Gove tal dist satara	akshayjadhav@gmail.com	2020-04-01	01.00pm-02.00pm	Approve
4	Sonal Jagtap	Varye,Satara	sonaljagtap@gmail.com	2020-04-05	10.00am-11.00am	Approve
7	Ankita Nevase	at post wai tal dist satara	nevaseankita@gmail.com	2020-05-24	11.00am-12.00am	Approve
8	Bhagyashree Shinde	at post limb tal dist satara	bhagi.web@gmail.com	2020-05-26	10.00am-11.00am	Approve

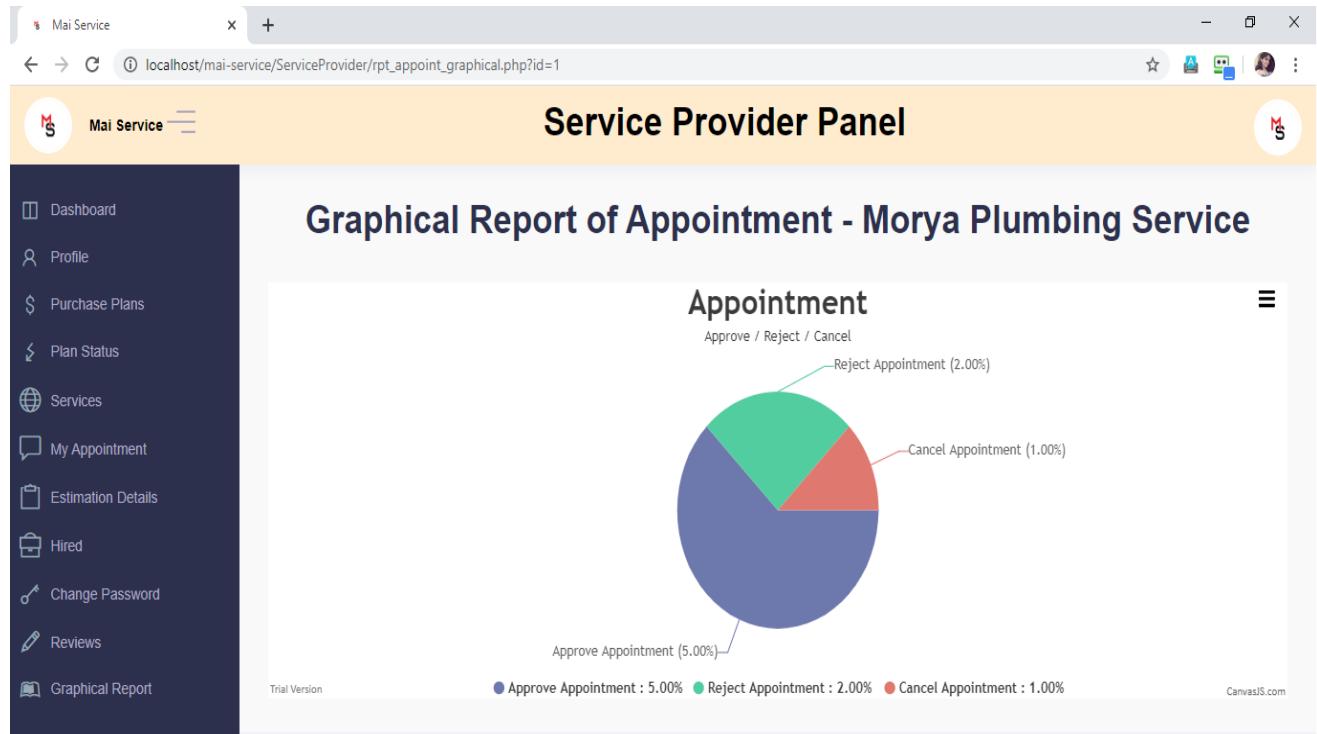

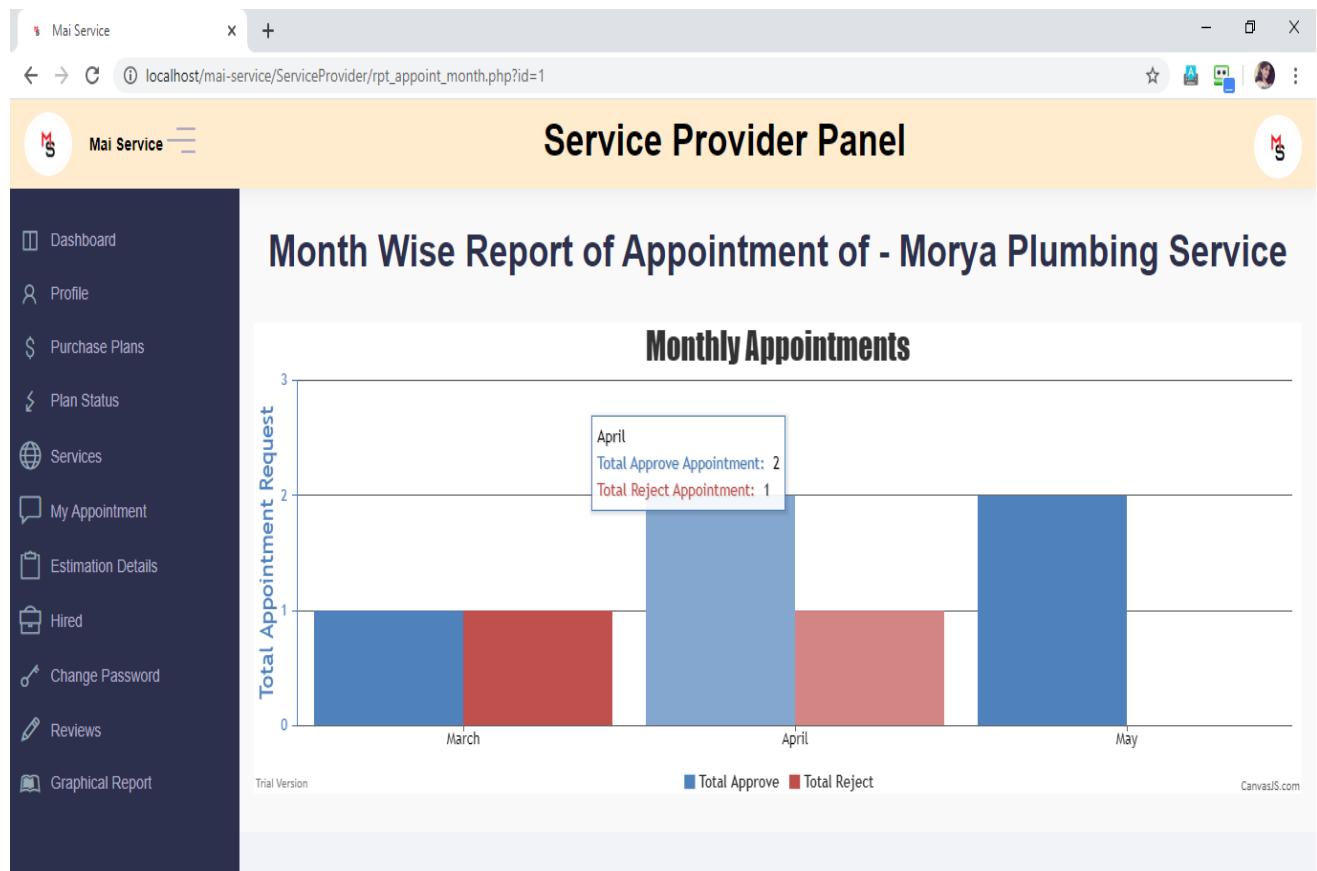

Reject Appointment Report – Display reject appointment report in .csv format.

Sr.No	Customer Name	Address	Email	Date	Time	Status
2	Sonal Jagtap	Varye,Satara	sonaljagtap@gmail.com	31/03/2020	0.00am-11.00ar	Reject
5	Priti Khandare	at post wai tal dist satara	priti123@gmail.com	14/04/2020	1.00am-12.00ar	Reject

Cancel Appointment Report –

Report of cancel appointment from user in .xlsx or .xls (excel) format.

Sr.No	Customer Name	Address	Email	Date	Time	Status
6	Bhagyashree Shinde	at post limb tal dist satara	bhagi.web@gmail.com	2020-05-22	11.00am-12.00am	Cancel

Appointment Report (Pie Chart) – Display appointment report in pie chart.Appointment Report (Bar Chart) – Display monthly appointment report in bar chart.

Estimation Report – Display report of estimation.

5	Priki Khandare	priti123@gmail.com	8380905672	2020-04-26 09:06:22	Repair the pipeline	300	Done

Showing 1 to 3 of 3 entries (filtered from 5 total entries)

Done Estimation Report –

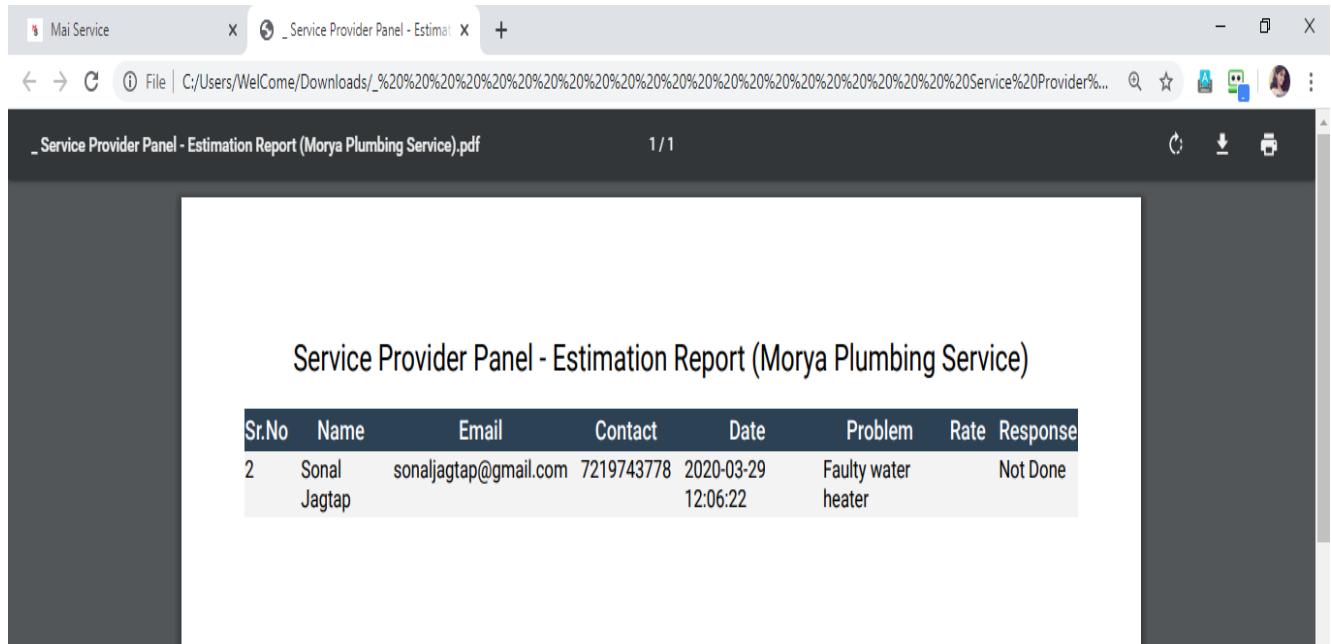

Display reports of estimation which is complete in a .pdf format.

The screenshot shows a PDF document titled 'Service Provider Panel - Estimation Report (Morya Plumbing Service).pdf'. The document contains a table with the same data as the previous screenshot, listing five estimated jobs for Morya Plumbing Service in April 2020. The table columns are Sr.No, Name, Email, Contact, Date, Problem, Rate, and Response.

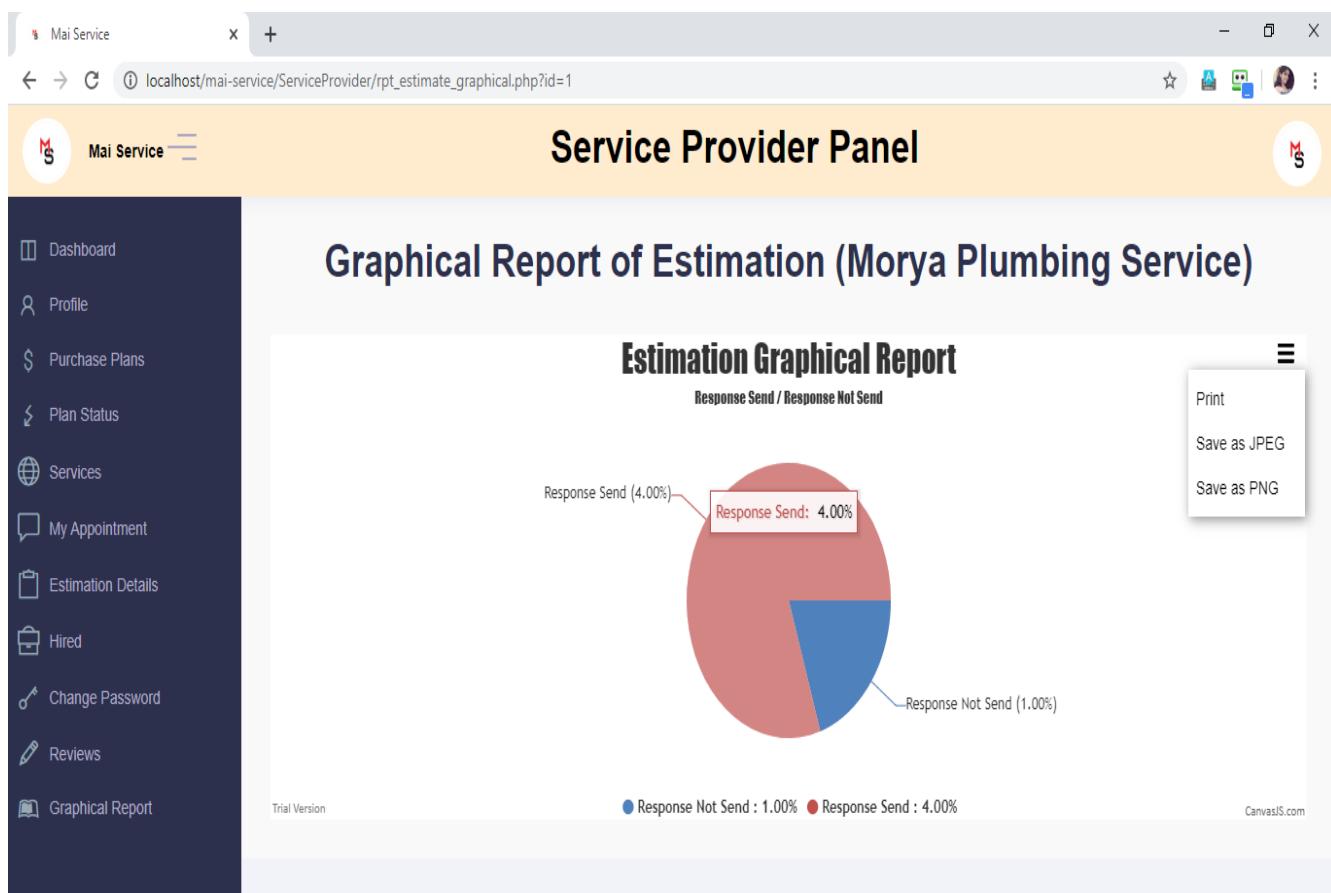

Sr.No	Name	Email	Contact	Date	Problem	Rate	Response
1	Sonal Jagtap	sonaljagtap@gmail.com	7219743778	2020-03-15 02:06:22	Repair the pipeline	200	Done

5	Priki Khandare	priti123@gmail.com	8380905672	2020-04-26 09:06:22	Repair the pipeline	300	Done

Not Done Estimation Report –

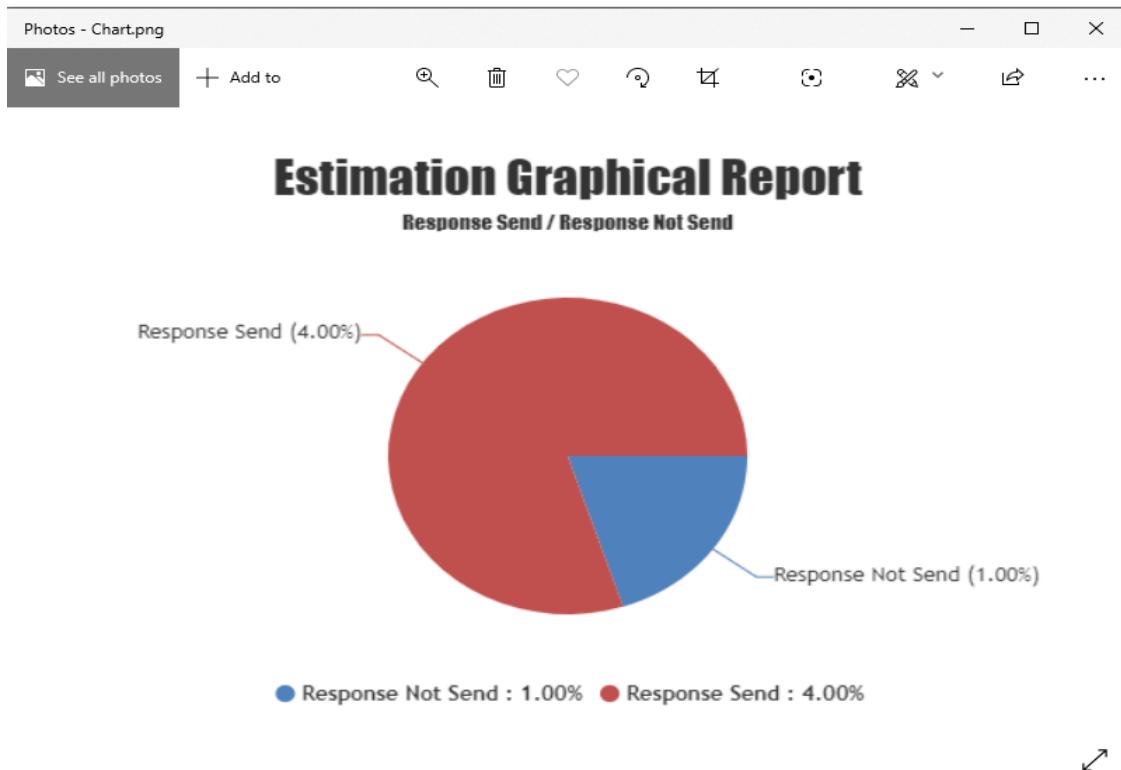

Display reports of estimation which is not complete in a .pdf format.

**Estimation Report (Pie Chart) –**

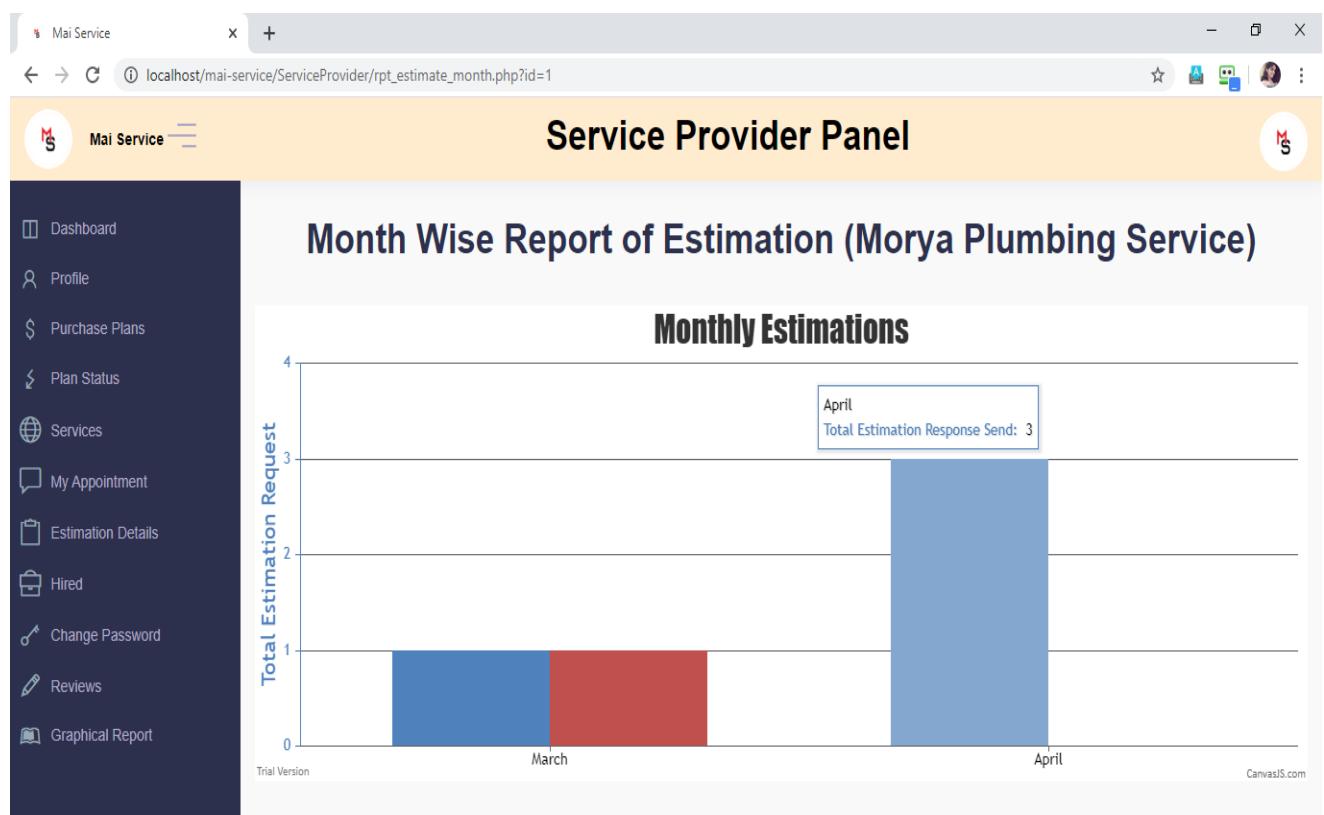

Display estimation report in pie chart.

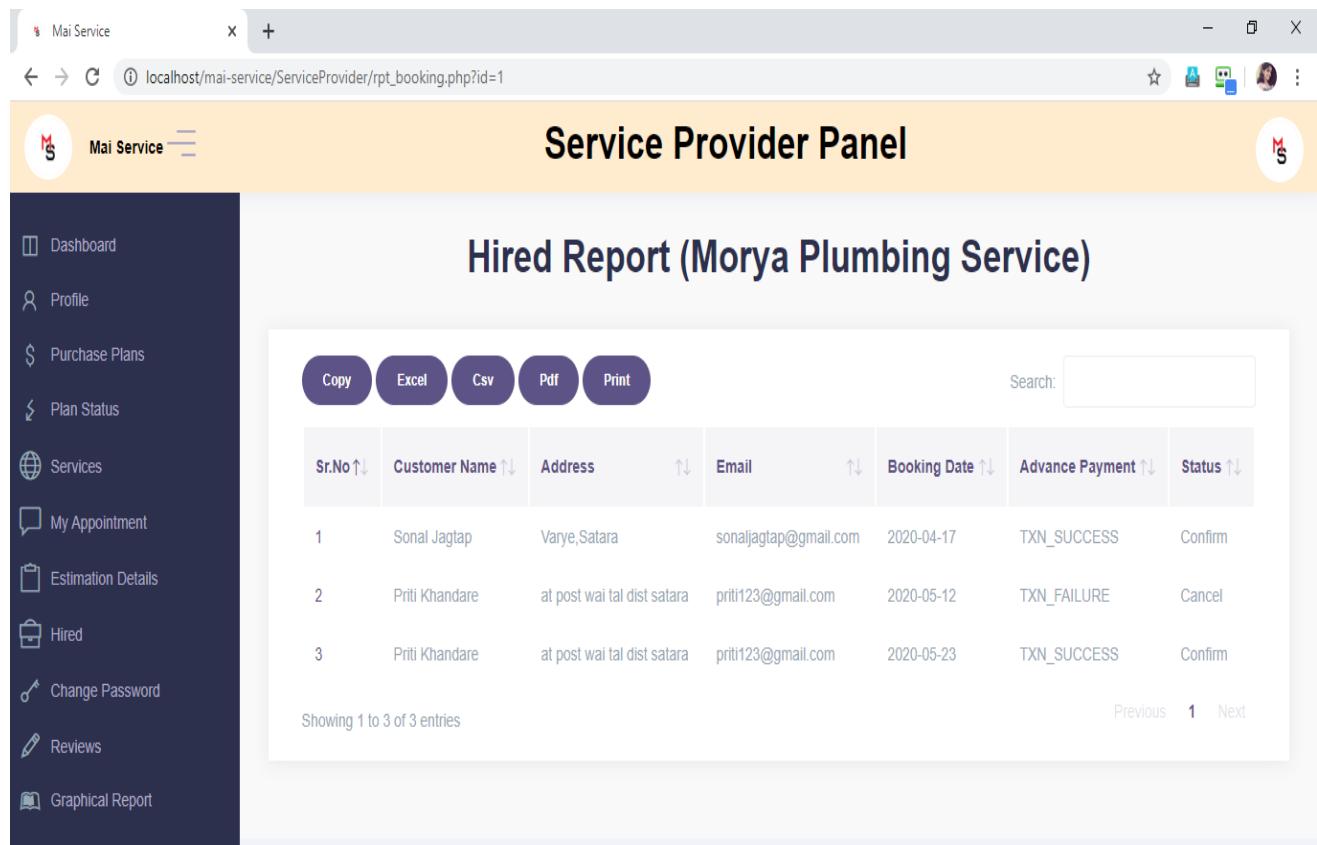

Estimation Report (Image) – Also get a estimation graphical report in .jpeg & .png format.

Estimation Report (Bar Chart) – Display monthly estimation report in bar chart.

Hired Report – Display the report of users who hired morya service provider in a tabular format.

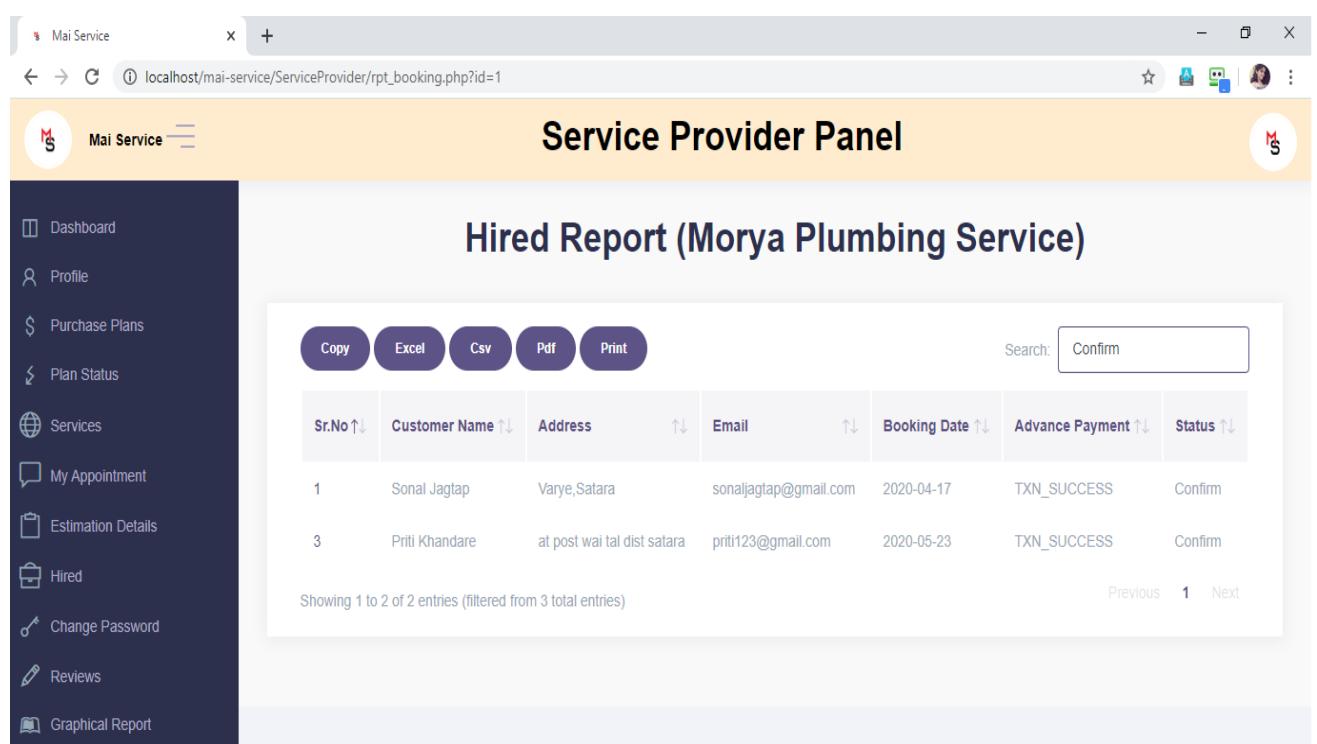

The screenshot shows a web-based application titled "Service Provider Panel". On the left, there is a sidebar with various menu items: Dashboard, Profile, Purchase Plans, Plan Status, Services, My Appointment, Estimation Details, Hired, Change Password, Reviews, and Graphical Report. The main content area is titled "Hired Report (Morya Plumbing Service)". It features a table with columns: Sr.No, Customer Name, Address, Email, Booking Date, Advance Payment, and Status. The table contains three entries:

Sr.No ↑↓	Customer Name ↑↓	Address	Email	Booking Date ↑↓	Advance Payment ↑↓	Status ↑↓
1	Sonal Jagtap	Varye,Satara	sonaljagtap@gmail.com	2020-04-17	TXN_SUCCESS	Confirm
2	Priti Khandare	at post wai tal dist satara	priti123@gmail.com	2020-05-12	TXN_FAILURE	Cancel
3	Priti Khandare	at post wai tal dist satara	priti123@gmail.com	2020-05-23	TXN_SUCCESS	Confirm

Below the table, it says "Showing 1 to 3 of 3 entries". At the top of the main content area, there are buttons for Copy, Excel, Csv, Pdf, and Print, and a search bar labeled "Search: []".

Confirm Hired Report –

Display the report of users who hired service provider with paid advance payment of that service.

This screenshot is similar to the previous one, showing the "Service Provider Panel" and "Hired Report (Morya Plumbing Service)" section. The sidebar and table structure are identical. However, the search bar at the top now contains the word "Confirm". The table data has been filtered to show only two entries:

Sr.No ↑↓	Customer Name ↑↓	Address	Email	Booking Date ↑↓	Advance Payment ↑↓	Status ↑↓
1	Sonal Jagtap	Varye,Satara	sonaljagtap@gmail.com	2020-04-17	TXN_SUCCESS	Confirm
3	Priti Khandare	at post wai tal dist satara	priti123@gmail.com	2020-05-23	TXN_SUCCESS	Confirm

Below the table, it says "Showing 1 to 2 of 2 entries (filtered from 3 total entries)".

Cancel Hired Report – Display the report of users who cancelled hired service provider.

The screenshot shows the Service Provider Panel interface. On the left, a sidebar menu includes options like Dashboard, Profile, Purchase Plans, Plan Status, Services, My Appointment, Estimation Details, Hired, Change Password, Reviews, and Graphical Report. The main content area is titled "Hired Report (Morya Plumbing Service)". It features a search bar with the placeholder "Search: Cancel". Below the search bar is a table with columns: Sr.No, Customer Name, Address, Email, Booking Date, Advance Payment, and Status. A single row is displayed: Sr.No 2, Customer Name Priti Khandare, Address at post wai tal dist satara, Email priti123@gmail.com, Booking Date 2020-05-12, Advance Payment TXN_FAILURE, and Status Cancel. At the bottom, it says "Showing 1 to 1 of 1 entries (filtered from 3 total entries)" and includes navigation links for Previous, Next, and a page number 1.

Sr.No ↑↓	Customer Name ↑↓	Address	Email	Booking Date ↑↓	Advance Payment ↑↓	Status ↑↓
2	Priti Khandare	at post wai tal dist satara	priti123@gmail.com	2020-05-12	TXN_FAILURE	Cancel

Date Wise Hired Report – Display the date wise report by entered the date.

The screenshot shows the Service Provider Panel interface, identical to the previous one but with a different search term. The main content area is titled "Hired Report (Morya Plumbing Service)". It features a search bar with the placeholder "Search: 2020-04-17". Below the search bar is a table with columns: Sr.No, Customer Name, Address, Email, Booking Date, Advance Payment, and Status. A single row is displayed: Sr.No 1, Customer Name Sonal Jagtap, Address Varye,Satara, Email sonaljagtap@gmail.com, Booking Date 2020-04-17, Advance Payment TXN_SUCCESS, and Status Confirm. At the bottom, it says "Showing 1 to 1 of 1 entries (filtered from 3 total entries)" and includes navigation links for Previous, Next, and a page number 1.

Sr.No ↑↓	Customer Name ↑↓	Address	Email	Booking Date ↑↓	Advance Payment ↑↓	Status ↑↓
1	Sonal Jagtap	Varye,Satara	sonaljagtap@gmail.com	2020-04-17	TXN_SUCCESS	Confirm

Month Wise Hired Report – Display the month wise report by entered the year & month.

The screenshot shows a web-based application titled "Service Provider Panel". On the left, there is a sidebar with various menu items: Dashboard, Profile, Purchase Plans, Plan Status, Services, My Appointment, Estimation Details, Hired, Change Password, Reviews, and Graphical Report. The main content area is titled "Hired Report (Morya Plumbing Service)". It features a table with columns: Sr.No, Customer Name, Address, Email, Booking Date, Advance Payment, and Status. There are buttons for Copy, Excel, Csv, Pdf, and Print. A search bar at the top right contains the value "2020-05". Below the table, it says "Showing 1 to 2 of 2 entries (filtered from 3 total entries)".

Sr.No ↑↓	Customer Name ↑↓	Address	Email	Booking Date ↑↓	Advance Payment ↑↓	Status ↑↓
2	Priti Khandare	at post wai tal dist satara	priti123@gmail.com	2020-05-12	TXN_FAILURE	Cancel
3	Priti Khandare	at post wai tal dist satara	priti123@gmail.com	2020-05-23	TXN_SUCCESS	Confirm

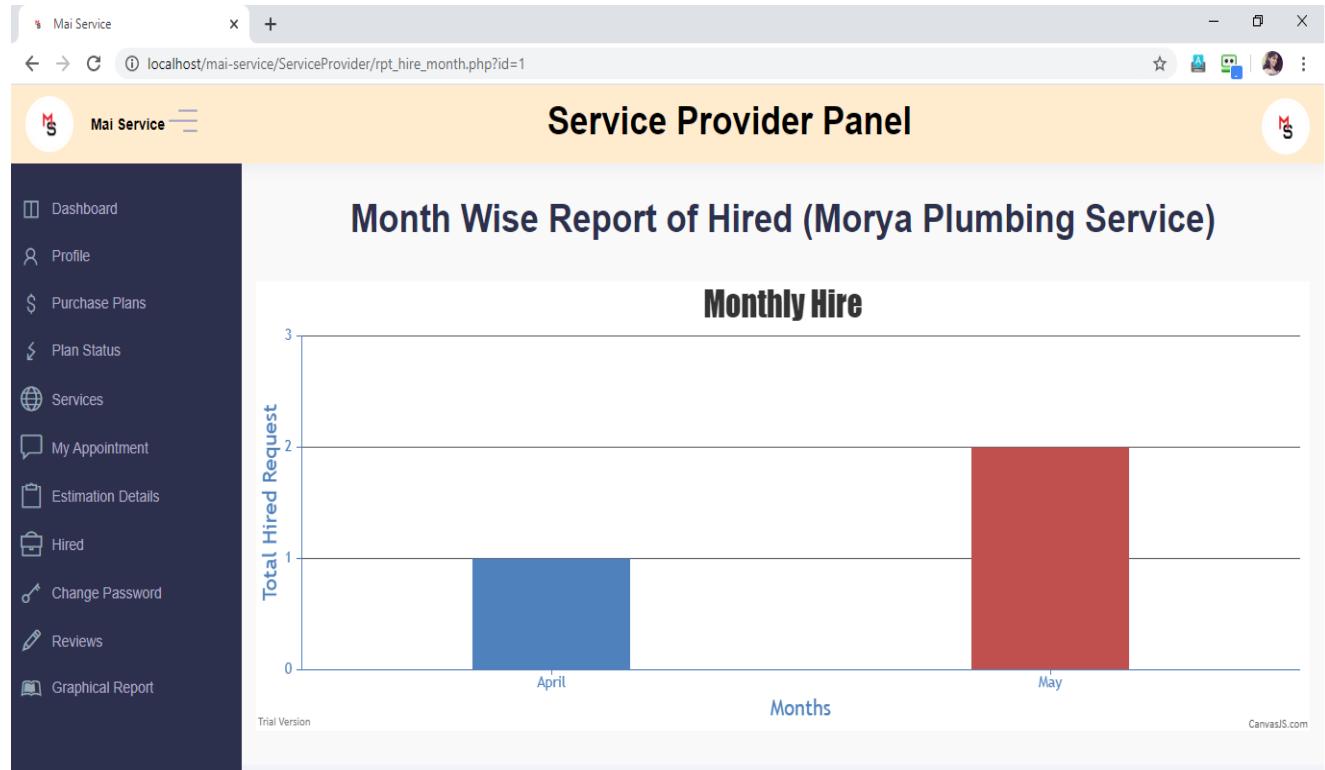

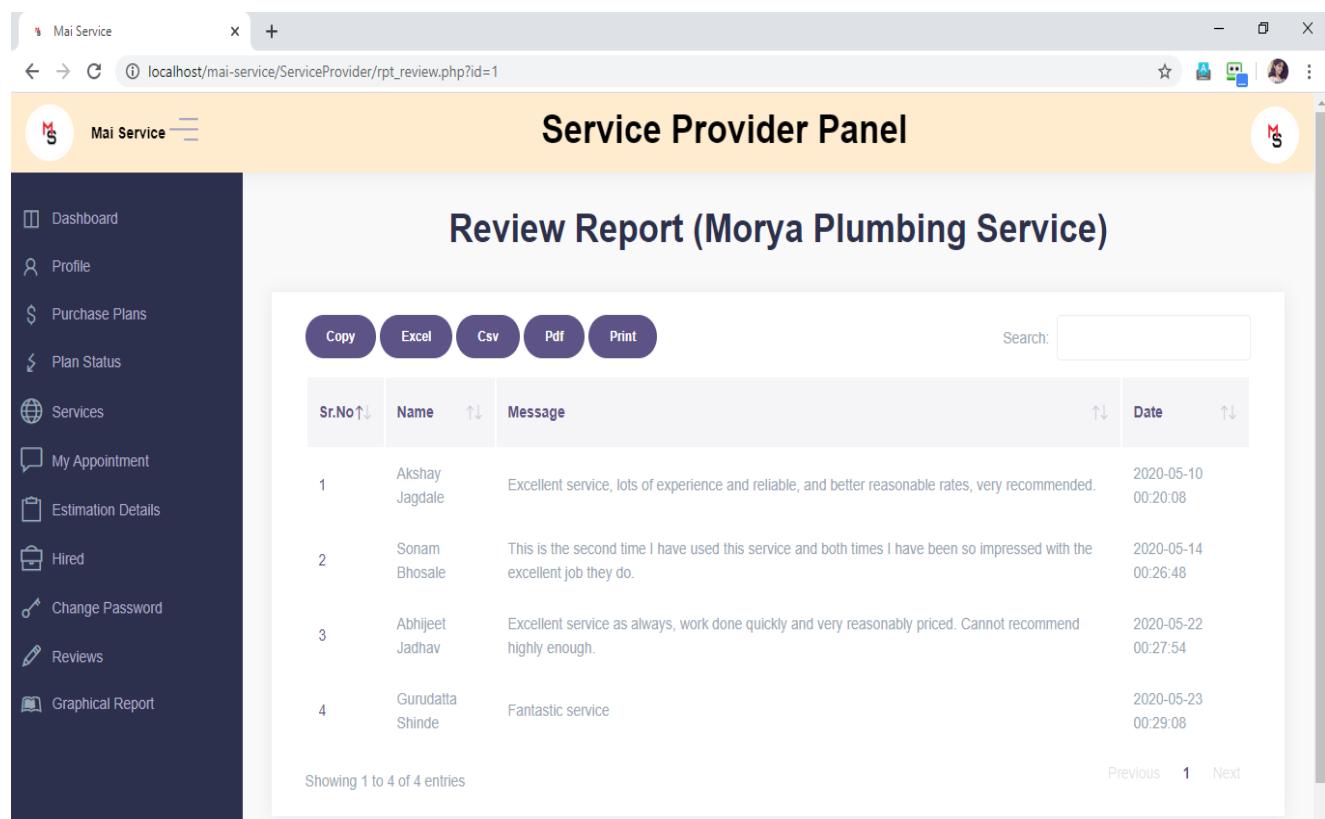

Graphical Report Of Hired –

Display the pie chart reports of the hired service provider confirm & cancel.

The screenshot shows a pie chart titled "Hired" under the heading "Confirm/ Cancel". The chart has two segments: "Confirm Booking (2.00%)" in blue and "Cancel Booking (1.00%)" in green. A legend at the bottom indicates "● Confirm Booking : 2.00%" and "● Cancel Booking : 1.00%". On the right side, there is a context menu with options: Print, Save as JPEG, and Save as PNG. The sidebar on the left is identical to the one in the previous screenshot.

Month Wise Report of Hire -

Display the month wise report of hired provider in a bar chart.

**Review Report -** Display the review report of service.

Graphical Report – Display over all services graphical report.
